ELSEVIER J. Non-Newtonian Fluid Mech., 55 (1994) 349–350

Journal of Non-Newtonian Fluid Mechanics

Contents of Vol. 55

Vol. 55, No. 1

Simulation of director orientation of liquid cyrstalline polymers in 2-D flows
R.Y. Chang, F.C. Shiao and W.L. Yang (Hsinchu, Taiwan) 1

Problems originating from the use of the Gordon–Schowalter derivative in the Johnson–Segalman and related models in various shear flow situations
A. Arsac, C. Carrot, J. Guillet and P. Revenu (Saint-Etienne, France) 21

Collapse of spherical bubbles in Maxwell fluids
C. Kim (Taejeon, South Korea) 37

Instabilities of a stagnation point flow of a dilute polymer solution
O.J. Harris and J.M. Rallison (Cambridge, UK) 59

Numerical simulation of the motion of a sphere in a Boger fluid
J.V. Jatrape (Akron, OH, USA) and M.J. Crochet (Louvain-la-Neuve, Belgium) 91

Calendar 113

Vol. 55, No. 2

Unsteady flow of semi-concentrated suspensions using finite deformation tensors
A. Ahmed and A.N. Alexandrou (Worcester, MA, USA) 115

Influence of a temperature gradient on the simple shear flow of a nematic liquid crystal
I. Heynderickx, W. Potze and E.J.W. ter Maten (Eindhoven, The Netherlands) 137

Start-up flow of an Upper Convected Maxwell fluid over a rotating disk
A.V. Borkar and J.A. Tsamopoulos (Buffalo, NY, USA) 163

Short Communications

Comments on the Doi-Ohta theory of blends
M. Grmela (Montreal, Ont., Canada) and A. Ait-Kadi (Laval, Quebec, Canada) 191

Unsteady flow of power-law fluids through circular pipes
Z.U.A. Warsi (Mississippi State, MS, USA) 197

Meeting Report 203

Book Review 207

Corrigenda 209

Calendar 213

Vol. 55, No. 3

A network model for predicting the shear thickening behavior of a poly(vinyl alcohol)/sodium borate aqueous solution
K.H. Ahn and K. Osaki (Kyoto, Japan) 215

On the stagnation flow behind a sphere in a shear-thinning viscoelastic liquid
M.B. Bush (Nedlands, WA, Australia) 229

Viscoelastic free surface flows: spin coating and dynamic contact lines
M.A. Spaid and G.M. Homsy (Stanford, CA, USA) 249

A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics
K.K. Kabanemi, F. Bertrand, P.A. Tanguy and A. Ait-Kadi (Montreal, Quebec, Canada) .. 283

Measurement of extensional viscosity by stretching large liquid bridges in microgravity
S. Berg, R. Kroger and H.J. Rath (Bremen, Germany) 307

Turbulent pipe flow characteristics of low molecular weight polymer solutions
A. Sá Pereira and F.T. Pinho (Porto, Portugal) 321

Calendar 345
